

**National Interagency Coordination Center
Incident Management Situation Report
Sunday June 1, 2014 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (81 new fires)
 New large fires: 0 (*)
 Large fires contained: 2
 Uncontained large fires: ** 4
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 1

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: An upper level trough of low pressure off the California Coast will bring isolated thunderstorms to the Intermountain West today. Showers and thunderstorms with heavy rain are expected to continue in the Northern Plains along a cold frontal boundary. A closed low pressure system will continue to move east with thunderstorms for the Southeast while much of the Eastern U.S. will see mild and dry conditions continuing.

ATTEMPTING A FRONTAL ASSAULT ON A FIRE

Operational Engagement Category

Attempting a frontal assault on a fire is recognized as Watchout Situation #10 and is a potentially dangerous tactic.

- If your tactics include a frontal assault, the following checklist must be adequately addressed before engaging the fire:
- Has the fire been scouted and sized up? Who will scout and size up a fire and what are they looking for?
- Is your position defensible? List what makes a firefighter's position defensible. (Anchor points, safety zones, escape routes, etc.)
- Are escape routes and safety zones adequate? Review what constitutes an adequate safety zone and escape route.
- Do you have an anchor point? How would you establish an anchor point for a frontal assault on a fire?
- Do you have adequate resources to complete the assault? Discuss things you need to consider; for example, if the frontal assault fails, do you have backup?
- Are you informed on strategy, tactics, and hazards? Consider what could happen if someone has a different approach than you; i.e., the IC has a burnout operation planned while you are attempting frontal assault.
- Is the terrain favorable to holding the fire? Discuss ways the terrain will influence where you will make a stand.
- Are you relying on aircraft for support operation? Any operation, especially frontal assault, should not need air resources to be safe.

In order to reduce the risks, reassess your tactics, post lookouts, identify situations in which firefighters may be enticed to attempt frontal assault on a fire. Review why this may or may not be a good idea.
